

Bangers *and* Cash 2020

School Lessons Pack

roundabout
YOUR LOCAL YOUTH HOUSING CHARITY

Bangers *and* Cash 2020

...Into your school

Roundabout has created a little pack to help inspire your teaching team of how to bring Bangers and Cash into the classroom!

English

- Writing stories and poems about travel
- Quick fire games for adjectives to describe a car (throw a ball round and whoever it is passed to needs to come up with a new word), this can be repeated for different countries.
- There are a lot of books, plays and literature on travel, the countries we go through and could be compared or shown to the class

Languages

What a great way to introduce your pupils to the languages spoken on our trip. Conversation starters and items they will use in school are a good start. You can have lots of fun comparing the languages from the floaty sounds of French to the harsh pronunciation of German, use the word “butterfly” for a great example!

Maths

Cars, miles, kilometres and fuel usage are great ways to start conversion rates. We can give you our route and your students can work out how much fuel is used for a part of the journey or convert the overall project from miles to kilometres.

History

WW1 and WW2 seem the most obvious to go to when talking about European countries but there are so many other opportunities on how Europe has played a part on the world stage for hundreds of years.

Food Tech

With six countries to choose from there are some really great local foods to try and cook:

- Sauerkraut (Fermented Cabbage) and gingerbread from Germany
- Apfelstrudel and Wiener Schnitzel from Austria
- Pastries, cakes and bread from France
- Älplermagronen or cooking with Swiss chocolate and cheese is always a winner!
- Stroopwafel and Poffertjes for a fun challenge from the Netherlands
- And of course your favourites from England!

Geography

The Bangers and Cash rally passes through 6 different countries: England, Netherlands, Germany, France, Switzerland and Austria. From capital cities to land marks to flags to terrain to manufacturing output and human geography, there is so much scope to include Bangers and Cash in your lesson plans

Science

What a great way to talk about cars!

You have an opportunity to talk about catalytic converters to hybrid, electric or fuel engines.

PSHE

Have a visit from either our Peer Educators or a member of our Fundraising team to teach your pupils about youth homelessness and what Roundabout is doing to help give young people a brighter future!

Art

Enter our Bangers and Cash Art Competition and you could see a design from your students on one of our team cars! Please see our Schools Art Pack for more details.
